Dear

has donated to the Water is Life

campaign in your name.

Your gift will help build a water well for one of the poorest communities in rural Ethiopia. In Ethiopia 80% of all diseases are a result of dirty water and more than 250,000 children under the age of five die each year from diarrhea. By supplying desperately needed clean water, the well will save women and children from walking 3-5 hours a day to collect contaminated water and will help protect against disease.

If you would like to know more about the progress of the well you have helped sponsor and the people benefiting from it, please e-mail us at info@wateril.org and we will send you periodic updates. The well will be completed within the next 12 months.

Water is Life is a 100% non-profit fundraising campaign run in cooperation with A Glimmer of Hope (www.aglimmerofhope.org) whose sole objective is funding water wells in rural Ethiopia. No water wells are built unless they are sustainable for 10-15 years. AGOH covers all operating overhead so 100% of your gift will reach the project
