Your gift provides clean drinking water in Ethiopia

In 2013 Bosse Johansson started a campaign to support the construction of a children's ward at Tercha Hospital in southern Ethiopia. Bosses personal involvement in the project and Adolf Fredrik's Girls' Choir Alumni's concert in January 2014 gave a fantastic result and collected over USD \$10,400 for the project.

The construction of the children's ward at the Tercha Hospital is now complete and has started accepting patients. It will offer care to an estimated 28,000 children every year.

Bosse's and the alumni choir's commitment to the children in Ethiopia has not tapered off with this. The proceeds from this year's concert, which was held on January 3rd will support a water project in the area of Tigray in northern Ethiopia.

Access to clean drinking water means better health and greater opportunities for education and income, especially for women and children in Ethiopia.

Thank you for your support,

Bosse
