Water is Life – 2011 Campaign

Adi Beret, Seglamen, Tigray (N. Ethiopia) – May Tsebri Hand Dug Well
(lat/long: 14.048070, 38.776020)

www.wateril.org

Seglamen is located in the Tigray region of Africa, where the climate is very dry and ground covered with rocks. With its arid conditions and extremely low water table, access to clean water is challenging and essential.

The May Tsebri well represents one of several water projects in the larger community of Seglamen, Tigray

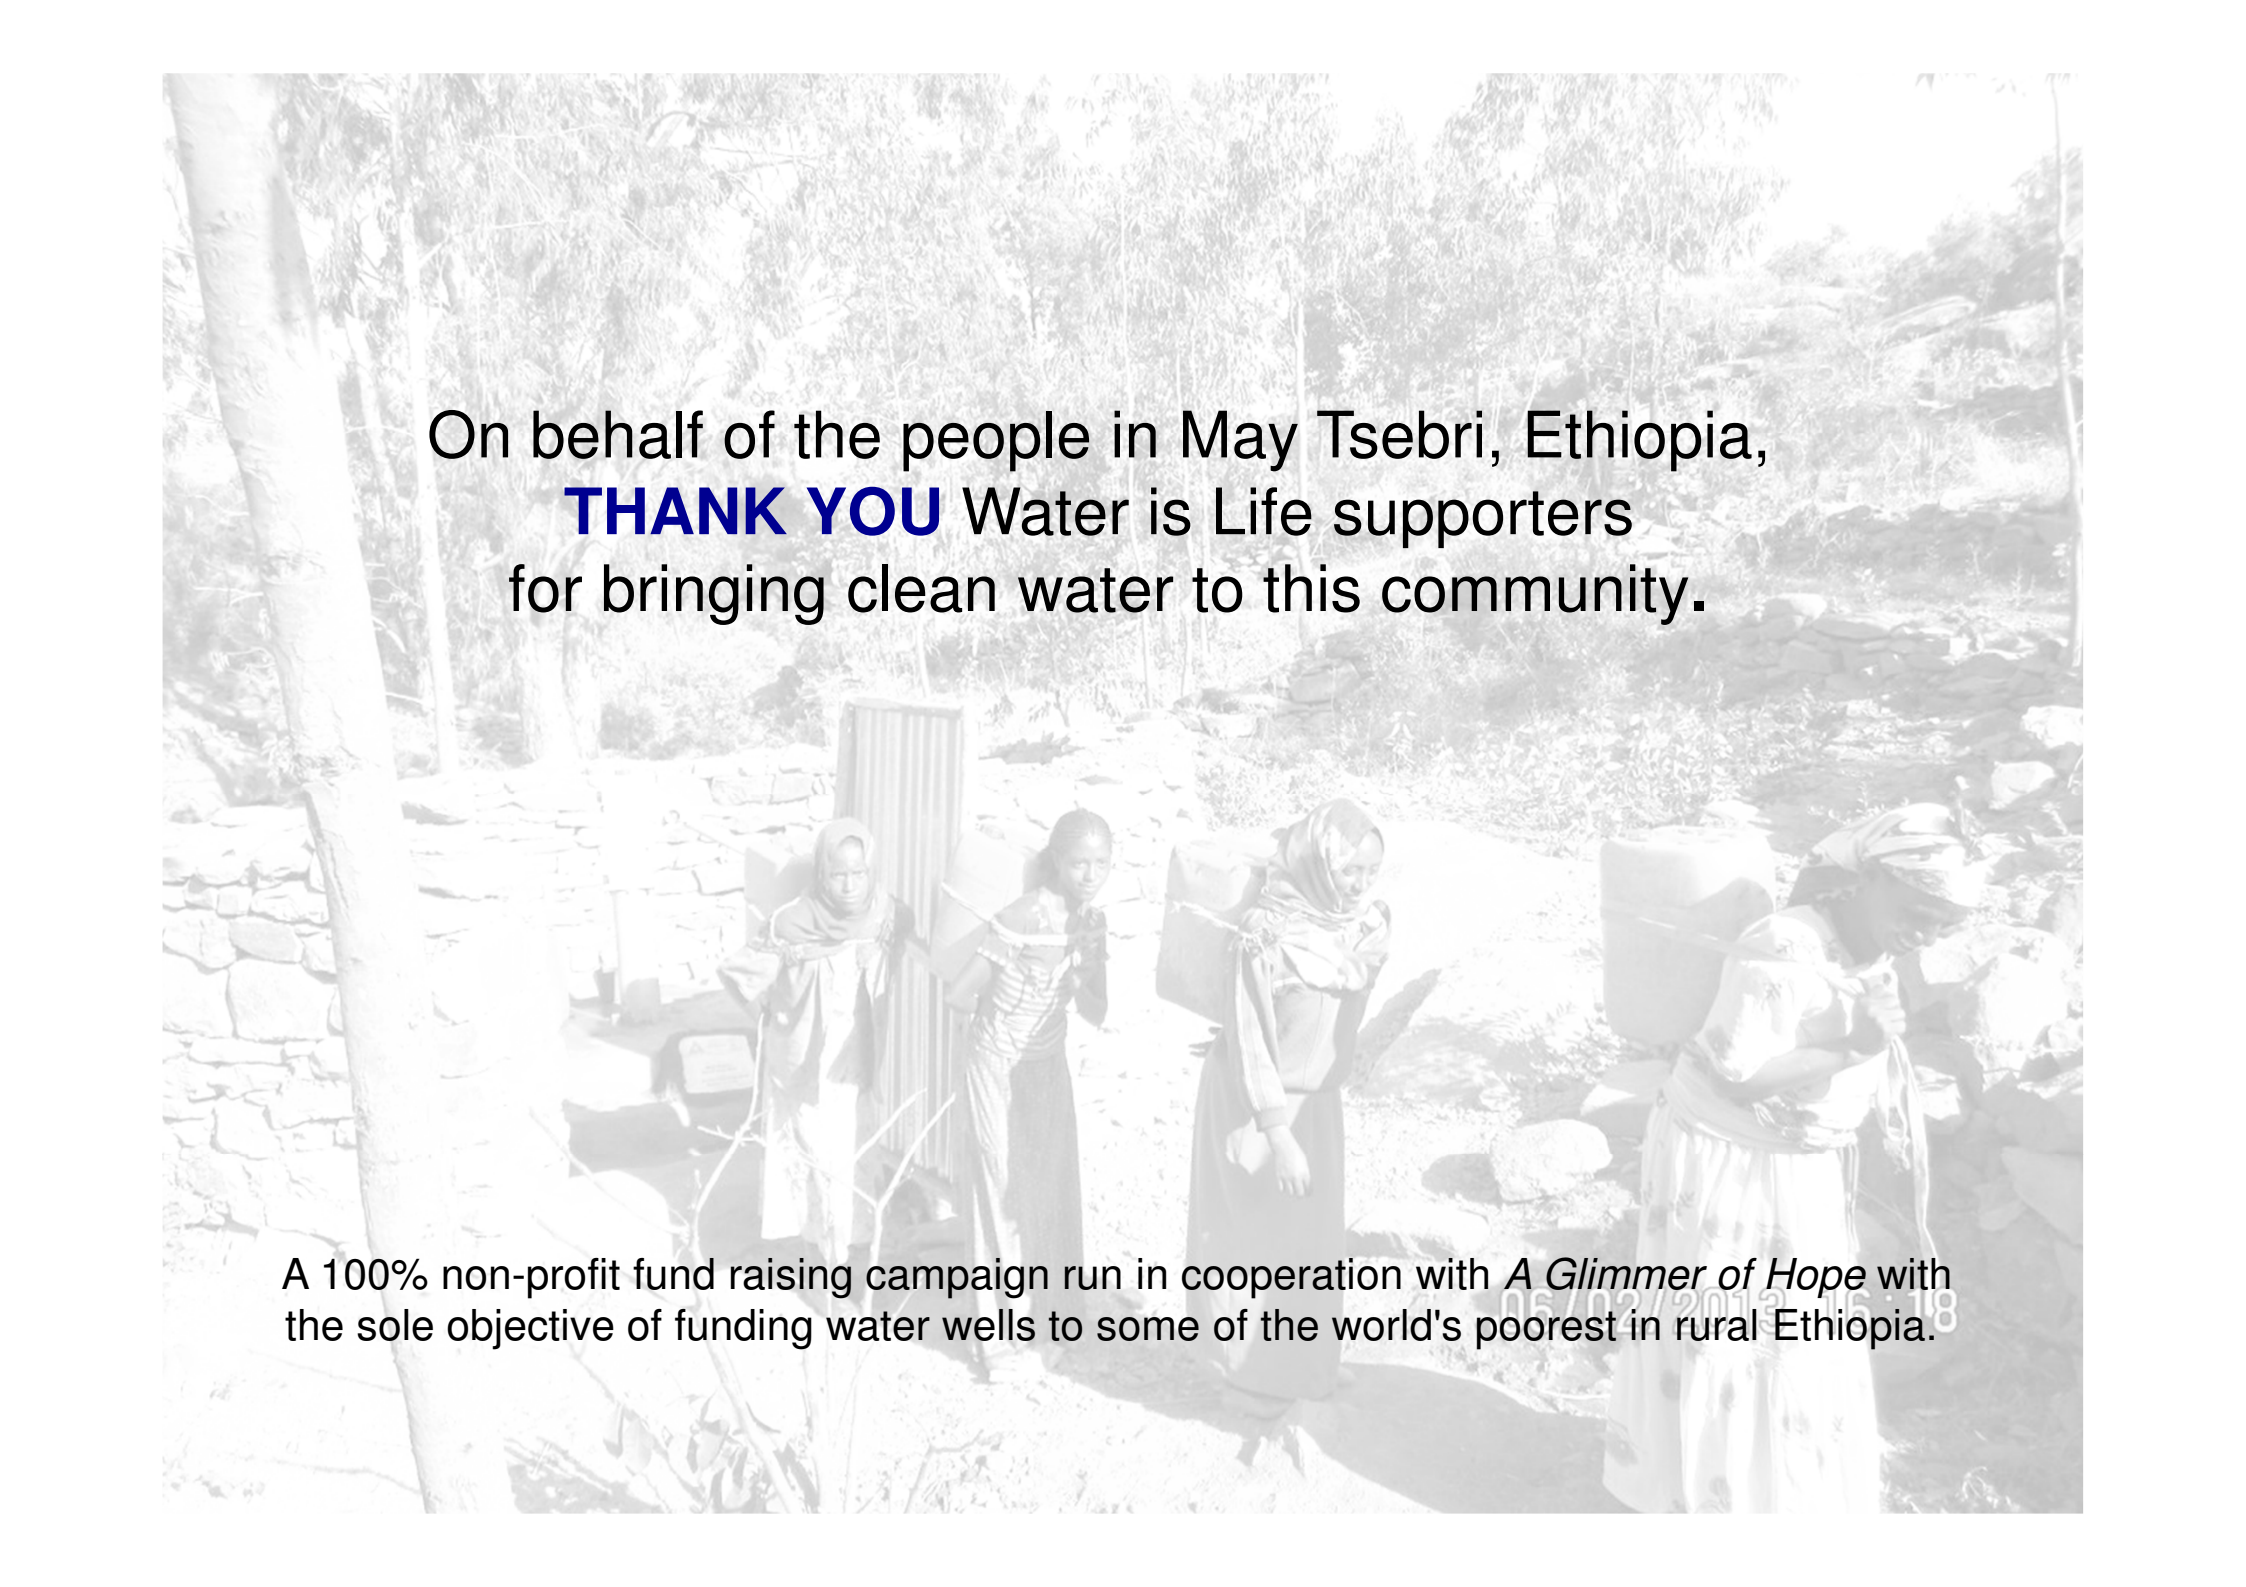

Once all the projects are completed, over 28,000 community members will have access to clean water.

As always, the community around the well has received training on the importance of hygiene and sanitation.

They have also been trained on how to care for the well and a committee responsible for its maintenance has been elected.

Due to poor hygiene and sanitation practices in Seglamen, infant mortality has been very high, and many community members have suffered from water-borne diseases or intestinal worms transmitted through dirty water. The completion of the May Tsebri well represents an important step towards better health in the community.

On behalf of the people in May Tsebri, Ethiopia,
THANK YOU Water is Life supporters
for bringing clean water to this community.

A 100% non-profit fund raising campaign run in cooperation with *A Glimmer of Hope* with the sole objective of funding water wells to some of the world's poorest in rural Ethiopia.
