Barcelona based SomHabesha was founded by a group of young adoptees from Ethiopia, in order to promote Ethiopian culture.

SomHabesha aims to support adoptive families in all aspects of post-adoption, and to help adopted children learn about their birth country and culture. We also want to collaborate with non-profit programs in Ethiopia, especially those aimed at improving the living conditions of children in the country.

Because of the severe drought currently affecting Ethiopia, SomHabesha has decided to raise funds for a water project in Gonder, in the region of Amhara, along with the American non-profit "A Glimmer of Hope".

A Glimmer of Hope has been working in Ethiopia for the past +15 years and has completed thousands of successful and sustainable water projects with millions of lives changed as a result of their deep commitment to the country.

We realize that we cannot solve the country’s problem, but we can alleviate the suffering of a few. We kindly ask for your help with this project, because- together we will have a greater impact.

Thank you!
